

## New SAP eLearning Course Available - Report Navigation

Oak Brook, IL, October 22, 2009 - teksoft ventures has officially released a new SAP training eLearning course, [Report Navigation](#).

The evolution of eLearning in the SAP training field is becoming more of an affordable solution due to the users' ability to reach their educational goals faster and easier.

The one-time per user fee of \$89.00 gives users 90 days of access. Each of teksoft's SAP training courses are designed by teksoft's performance-driven SAP training experts. teksoft ventures' self-paced courses include human narration, simulations of SAP, and multiple assessments throughout. Report Navigation can now be purchased on the teksoft ventures website located at <http://www.teksoftventures.com/reportnav.asp>.

When asked why teksoft decided to create eLearning courses, teksoft ventures CEO, Jan Konn, said, "It's all about the blended learning solution to get the message across. Elearning will continue to grow in popularity, but instructor led training will never be replaced."

The [Report Navigation](#) course is now the 3rd installment of teksoft's SAP eLearning courses which also include the [Overview & Navigation](#) course and the [Advanced Navigation](#) course.

---
